

Sound

Jinyan Yu, Pat

In this rotation I have been told to do some practice about sounds.

The first activity is to visualise sounds. I have gone to the school cafeteria and listen to the surrounding and recorded them down in my own way.

The next one is to shoot 10 videos and edit them into a 20 sec Vedic with sounds. I have recorded my way back home and cut and edit the sounds to make a video called "Way Home". The reason why I have chosen this to do is because I didn't really focus on how and what I hear everyday on the familiar path. So I want to go deeper to it.

The last one is to make three 10 second film with sound. I have recorded all of the sounds by myself. After recording them, I tried to draw 3 animations to fit them. It is interesting to find sound, create sound and record them. I like the way I draw the animations but I think I should put more efforts on sound editing.
